Chemistry is the scientific discipline involved with elements and compounds composed of atoms, molecules and ions: their composition, structure, properties, behavior and the changes they undergo during a reaction with other substances.

Chemistry - Wikipedia

Chemistry is a natural science that studies the composition, structure, and properties of matter, as well as the changes it undergoes during chemical reactions. It is a central science that bridges physics, biology, and geology. The field of chemistry is divided into several sub-disciplines, including organic chemistry, inorganic chemistry, physical chemistry, and analytical chemistry. The study of chemistry is essential for understanding the world around us and for developing new materials and technologies.
