Your study reaches Master's level in the fourth year, including advanced modules from our MSc course in Biomedical Engineering, which we have been teaching since 1991. Studying to this level means that graduates require fewer years of work experience to become a Chartered Engineer (see Professional accreditation).

Nanotechnology ("nanotech") is manipulation of matter on an atomic, molecular, and supramolecular scale. The earliest, widespread description of nanotechnology referred to the particular technological goal of precisely manipulating atoms and molecules for fabrication of macroscale products, also now referred to as molecular nanotechnology.
